NATIONAL PHOTOGRAPHIC INTERPRETATION CENTER

NAME
Leningrad Southwest AMM/SAM Launch Complex, Changes and Addi-
tions, [REDACTED]

COUNTRY	GEO COORDINATES	WAC	REF NO	NPIC NO	COMOR NO
USSR	59-43N 029-18E	0153	[REDACTED]	[REDACTED]	[REDACTED]

25X1A

25X1D

25X1D

25X1D

The complex is observed on good-quality, stereo [REDACTED]. Significant changes and/or additions since [REDACTED] include: construction of a loop road along the complex main road opposite the access road to Launch Site A (trees had been cleared at this location in [REDACTED]); a new ground scar extending from Launch Site C toward the Support Area; construction activity midway between the Complex Control Center and the NW outrigger position. This latter activity consists of possible preparation of a fourth position for the Electronic Site under construction and additional tree clearance.

25X1D

Vehicles/pieces of equipment are located on the perimeter road in the vicinity of at least 5 of the missile-ready buildings of Launch Site E. Several were present in [REDACTED] but changes in their positions have occurred since that time.

25X1D

There appears to be an erector/launcher at the launch point of each launch position of Site E. Small photographic scale precludes confirmation of their presence.
